## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-4 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or make obvious a circuit comprising: a plurality of windings, each of the windings having a first end connected at common node and each of the windings having a second end connectable directly to supply voltages by switches, the second end connected to an upper supply voltage; blocking circuitry connectable with the second ends, the blocking circuitry producing a blocked voltage, the blocked voltage representing a voltage across an associated winding; a comparator receiving the blocked voltage on one input and a reference voltage on another input, the comparator result indicating polarity of a back emf voltage in the associated winding, wherein one input of the comparator is connected via a single direction switch to the second end of a winding and the single direction switch has an anode connected to one input of the comparator and a cathode to receive voltage signal from the second end of a winding; a latch providing control signals for the circuit, an input of the latch enabled by an enable signal, an output of the latch comprising a back emf voltage detection signal, wherein the blocking circuitry and the comparator are duplicated for each of the windings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
